

Desco Super-Q-Sol

Steam Cleaner And Rig Wash Concentrate

Description:

Super -Q-Sol makes a solution that will penetrate and remove all types of grease and grime normally encountered in industrial and commercial cleaning jobs.

Low foaming penetrants and boosters quickly cut grime and emulsifiers retain and float away residue for a like-new finish. This product will not clog jets or lines in power equipment with undissolved powders that were not successfully premixed.

Super-Q-Sol concentrate is a complex, biodegradable liquid detergent that is most effective with high dilution ratios of water. It is formulated for steam cleaners and power washers, but equally effective when applied by rag, brush or spray. It is an excellent rig wash.

Super-Q-Sol exhibits controlled sudsing to promote efficient pickup with good scrubber operation; the solution performs with high dilution ratios to strip or emulsify grime on floors and equipment with a minimum soak time. A normal dilution ratio of 1 to 50 parts water is recommended but the ratio will vary from 1 to 20 parts water up to 100 parts water, according to water properties and cleaning conditions. The cleaning solution is non-flammable and can be used in hazardous plant areas.

Additional Information:

Do not use full strength.

Special additives: Synthetic soaps and sequesterants.

How to use: Dilute with water. Adjust dilution for specific job and water. Apply with steam cleaner, power washer, floor scrubber, brush, sponge, mop or cloth.

Suggested dilution: Parts water to concentrate

Minimum / 5 to 1

Maximum / 100 to 1

Steam cleaners / 50 to 1

Floor scrubbers / 30 to 1

Power washers / 40 to 1

Note: Do not apply to hot surfaces. Works well on surfaces which are warm to the touch. Water quality and temperature will effect the solution's cleaning power. Adjustment of cleaning concentrate may be necessary for specific job and water

Typical Characteristics:

Color	green
Temperature range	33 ^o F to (+1 ^o C)
pH of concentrate	9.2-9.8
