

345 Weather-Coat

Thred On

All Purpose Protective Coating

Description:

Weather-Coat is a protective coating for use in machine shops, pipe yards, offshore platforms or anywhere metal needs to be protected for short or long periods of time. It is a pliable, brushable coating that protects and preserves against rust and corrosion. It leaves a semi-fluid non-hardening protective coating that protects metal against rust and corrosion for extended periods in sun, rain, sand, salt-water and/or frigid temperatures. Excellent for freshly cut metals. Does not need to be removed before assembly of close tolerance parts. Will act as a lubricant during assembly.

Weather-Coat can be brushed on, thinned with mineral spirits and sprayed on or used for dip coating.

Weather-Coat is highly resistant to moisture. Adequately coated items may be left outdoors unprotected indefinitely.

Weather-Coat can be removed using common solvents such as diesel or paint thinner.

Typical Characteristics:

NLGI grade	2
ASTM dropping point	>350°F (177°C)
Water resistance	excellent
Corrosion inhibitors	present
Oxidation stabilizers	present
Color	red
Consistance	tacky
Army/Navy humidity test	AN-H-31 pass

Packaging Information: 345 Weather Coat

Item No.	Unit Size	Quantity	Net Wt.	Ship Wt.
WC01-16	1 gal.	1 each	10 lbs.	12 lbs.
WC05-16	5 gal.	1 each	35 lbs.	38 lbs.
WC55-16	55 gal.	1 each	400 lbs.	435 lbs.
